

OCL Update

To: Community Representatives

From: Janyce Hedetniemi, Director
Office of Community Liaison
National Institutes of Health (NIH)

Date: October/November 2001

NOTES FROM THE DIRECTOR, OFFICE OF COMMUNITY LIAISON

The events of September 11 have affected us all. On behalf of the NIH, I extend my deepest sympathy to those in our community who may have suffered a personal loss in New York, Washington, or Somerset, Pennsylvania.

We at NIH have done our part to respond to the President's appeal for assistance. In the days immediately following the tragic attacks, NIH doctors, nurses, and Commissioned Corps Officers were ready to be deployed as needed; our environmental health centers in New York helped authorities assess the potential health consequences of the destruction; the Clinical Center offered to house patients as needed; and NIH dentists were on call to help in forensic identification. In a matter of days, NIH employees contributed nearly 400 units of blood and still, blood donations continue steadily. NIH employees now can make immediate donations to relief organizations through the Combined Federal Campaign and on Thursday, September 13, hundreds of NIH employees observed the national day of prayer and remembrance with an ecumenical service at noon in Masur Auditorium.

We also have responded to the call for heightened security at all federal installations. Most obvious of these responses has been the closing of all but five entry points to the campus. Initially, there were problems of congestion and confusion but, in the last three weeks, NIH has been working with our colleagues at Navy and in Bethesda to find ways to ease traffic congestion while still maintaining necessary security. You can access the most recent information about campus security at <http://www.nih.gov/od/ors/security>.

Additionally, we are encouraging employees to use Metro, Ride-on buses, car pools, van pools, and bicycles to reduce traffic. In the last three weeks, 200 employees have been added to the more than 3,300 who already use Transshare, a program that allows employees to trade in parking permits for monthly stipends of \$65 for public transit.

Visitors to campus should follow directions to the designated campus entrances and should allow extra time for identification and vehicle inspections. Foot traffic through campus is not restricted, but you are urged to have identification with you at all times.

(continued on page 2)

The Community Liaison Council (CLC) will hold its next meeting on **Thursday, November 15, at 4 P.M.**, in Building 45, Room D on the NIH campus.

(continued from page 1)

Another change as a result of the heightened security has involved NIH's ability to support group activities while maintaining a secure campus. We were reluctant, for example, to go to print with the October issue of the *OCL Update* because of the changing schedules and locations of lectures, seminars, and other events. We hope that in time, we will be able to restore some programs to campus, but for now, please note within this issue those events and activities that have been cancelled, postponed, or moved.

NIH is doing its best to conduct business as usual, but we also are trying to seek our way through the changed landscape of America. To the extent that we secure our campus and employees, we also ensure safety for our neighbors and community. Most importantly, we ensure that the business of biomedical research is not interrupted and that this agency can continue its effort to eradicate disease and disability—for all people. Thank you for your patience, your understanding, and your fortitude.

NIH CAMPUS NEWS AND ACTIVITIES

NIAID Director Receives Humanitarian Award

In October, Anthony S. Fauci, M.D., director of NIH's National Institute of Allergy and Infectious Diseases (NIAID)

Dr. Fauci receives Annunzio Award.

received the 2001 Frank Annunzio Award in the Humanitarian Field at an awards ceremony in Chicago. Presented by the Christopher Columbus Fellowship Foundation (CCFF)—an independent government agency which supports discoveries in all fields that benefit mankind—the award is given to Americans whose thinking has led to creative work, process, product, or other achievement that has had a significant and beneficial impact on society.

NIH Acting Director Ruth Kirschstein, M.D., said that Dr. Fauci deserves the honor: "I have known Dr. Fauci for nearly 30 years and seen firsthand his extraordinary accomplishments as a scientist, clinician, administrator, and communicator of science." Dr. Fauci has made many important contributions to basic and clinical research on the pathogenesis and treatment of infectious diseases. His AIDS-related work is universally renowned and has served as the basis for our current strategies in developing effective therapies for AIDS, including possible vaccines.

The Frank Annunzio Awards are named for Rep. Frank Annunzio, a former congressional representative from the 11th district of Chicago and founder of the CCFF.

Nobel Laureates, Actor Christopher Reeve Discuss Brain Research

NIH celebrated 50 years of achievement in brain research during a two-day symposium with leading researchers in neuroscience and neurology held on the NIH campus in early October. On the first day, actor Christopher Reeve discussed the contribution that brain research has made in helping him and other patients with spinal cord injuries. The second day featured a panel of four Nobel Prize winning neuroscientists, moderated by CBS News' Lesley Stahl. They discussed how past and current research has led to a better understanding of the brain which in turn can lead to future treatments and cures for neurological diseases. Sponsored by the National Institute of Neurological Disorders and Stroke and the National Institute of Mental Health, the event drew top researchers, clinicians, and patient advocacy groups from across the country.

Farmer's Market, Lobster Truck Changes

The Farmer's Market in Parking Lot 41B has been temporarily halted, but the NIH Recreation and Welfare Association hopes to bring this back as soon as possible. The Salt River Lobster Truck has moved from NIH to the community store at the corner of Old Georgetown and Greentree Roads. For more information, call 301-496-6061 or visit <http://www.recgov.org/r&w/r&w.html>.

NCI Director Resigns; Dr. Rabson Named Acting Director

National Cancer Institute (NCI) Director Richard Klausner, M.D., stepped down September 28 to become president of the newly founded Case Institute of Health, Science, and Technology. He will continue to work with NIH as a special volunteer.

Dr. Alan Rabson

Since his appointment as NCI Director in 1995, Dr. Klausner has led an evolution of NCI activities, creating many new programs and initiatives. Under his leadership, NCI has experienced a doubling of its budget and expanded research across clinical, epidemiological, and basic sciences, resulting in the development of innovative treatments and technologies. "Rick Klausner has been an extraordinary leader in the fight against cancer," said Health and Human Services Secretary Tommy G. Thompson. "His vision and leadership will be thoroughly missed."

Alan S. Rabson, M.D., deputy director of NCI since 1995, will serve as acting director. Dr. Rabson has worked with NIH for 45 years, and prior to his appointment as deputy director, he was director of NCI's Division of Cancer Biology, Diagnosis, and Centers. He holds clinical professorships in pathology at Georgetown University Medical Center, The George Washington University, and the Uniformed Services University of the Health Sciences. He is also a member of the Institute of Medicine.

NIH Grantee Wins Nobel Prize

Long-time NIH grantee Dr. Leland H. Hartwell received the 2001 Nobel Prize in Physiology or Medicine this October for his discovery of genes that control the cell division cycle. Dr. Hartwell's research, which has received more than \$40 million in NIH grant support over the past 35 years, has led to "an explosion of knowledge" on how cells manage a crucial life process, said NIH Acting Director Ruth Kirschstein, M.D. As a result, his work has led to a better understanding of diseases like cancer and some birth defects where cell division goes awry.

Dr. Hartwell, who serves as president and director of the Fred Hutchinson Cancer Research Center in Seattle and professor of genetics at the University of Washington, received the award jointly with Dr. Paul M. Nurse and Dr. R. Timothy Hunt, both of the Imperial Cancer Research Fund in London.

Essentially, Dr. Hartwell determined how a cell is able to copy its genetic information faithfully and divide in two without transmitting potentially lethal genetic errors. Discovering more than 100 genes involved in cell cycle control, including the gene that controls the first step in the process, Dr. Hartwell has also documented the existence of cell cycle checkpoints. These "checkpoints" are ordered collections of genes and proteins that ensure that cell cycle events have been completed properly before the cycle continues.

"Share the Health" Forum Postponed

Because weekend and evening events at Building 45 on the NIH campus have been cancelled for October, NIH has postponed its fourth annual "Share the Health" community forum.

This free event, entitled "Share the Health: An Exposition of Health Resources from NIH to Its Neighbors," was originally scheduled for Saturday, October 27, 2001, from 8:30 A.M. to 3 P.M. in the Natcher Conference Center in Building 45 on the NIH campus. Event organizers have not yet rescheduled the event, but plan to hold it in the spring of next year.

Sponsored by the NIH Office of Community Liaison, this free event features health seminars, blood pressure and stroke screenings, wellness workshops, exhibits by NIH institutes, computer demonstrations, family-friendly activities, and more.

More information about rescheduling will be forthcoming and will be posted on the event Web site at <http://sharethehealth.od.nih.gov>.

2001–2002 FAES Chamber Music Series

The 34th season of the NIH Foundation for Advanced Education in the Sciences (FAES) Chamber Music Series began on October 14 with Louis Lortie on piano. Performances are held at 4 P.M. Sundays at the Masur Auditorium in Building 10 on the NIH campus. Tickets are \$25 (\$10 for students and fellows) and may be purchased in advance or on the day of the performance in the bookstore in Building 10 (Room B1 L 101) between 2:45 and 3:45 P.M. Although the series is still scheduled, performance dates may change. Call 301-496-7975 or visit <http://www.faes.org/music.htm> to confirm performance dates and locations.

November 4	Mendelssohn Quartet
November 18	Royal Irish Academy of Music Strings with John O'Connor, <i>piano</i>
December 16	Richard Goode, <i>piano</i>
January 13, 2002	Randall Scarlata, <i>baritone</i> , and Cameron Stowe, <i>piano</i>
January 27	Takacs Quartet
February 10	Brazilian Guitar Quartet
March 10	Altenberg Trio
March 24	Richard Stoltzman, <i>clarinet</i>
April 7	Emmanuel Pahud, <i>flute</i> , and friends

Household Hazardous Waste Pickup Set

Don't put your hazardous materials in the garbage or down the drain. Let Montgomery County's Solid Waste Service take care of it. Bring your hazardous materials to the Shady Grove Road Solid Waste Transfer Station on **Sunday, November 18**, from **10 A.M. to 2 P.M.** Please note that the pickup originally scheduled for November 17 at NIH has been cancelled. The Shady Grove transfer station is located at the corner of Route 355 and Shady Grove Road in Rockville. For more information, call the Division of Solid Waste Services at 240-777-6410 or visit <http://www.dpwt.com/SolWstSvcDiv/wastereduction/hhw.htm>.

Human Genome Consumer Day Planned

The National Human Genome Research Institute (NHGRI) will hold its third annual Consumer Day educational conference November 9–11, 2001 in Washington, D.C. "The Human Genome Project: An Informational Conference" aims to update the community about the scientific goals and accomplishments of the Human Genome Project. The conference, which is free and open to the public, also encourages students, especially minorities, to pursue careers in genomic and ELSI research. Participants in the conference can discuss the complex ethical, legal, and social implications of human genetics research with leading scientific authorities. For more information, visit <http://nhgri.nih.gov/CONF/> or call the NHGRI Office of Policy and Public Affairs at 301-402-0955.

Benefit Dance for NIH Charity

Come and dance with the NIH Ski Club as it raises skiing money for kids with cancer. On Friday, November 2, from 8 P.M. to midnight, the ski club is sponsoring a benefit dance at the Gaithersburg Holiday Inn to help raise money for Special Love, Inc., an NIH charity that offers programs for children with cancer that enables them to experience things that healthy children enjoy every day. *Retro-spect* will provide music, and dancers can enjoy a light buffet and participate in auctions. Tickets can be purchased for \$30 per person at the NIH Recreation and Welfare Association's Activities Desk in Building 31 on the NIH campus. For more information, call Bob Bingaman at 301-829-2079.

Mobile Mammography Screening

The George Washington University Breast Care Center will visit NIH for its Fall 2001 Mammography Screening for NIH employees, their families, and others associated with NIH. Screening will take place on-site from 9:30 A.M. to 3:45 P.M. by appointment. A female technologist will conduct each screening, and a board-certified radiologist specializing in mammography will interpret the films. Each appointment, which should last about 20 minutes, costs \$138; the cost can be paid by cash, check, or insurance. To see if your insurance is accepted or to make an appointment, call 202-994-9999.

The screening dates are:

- November 6** Building 10, Lot 10H
- November 13** Executive Plaza North and South, parking lot behind the complex
- November 20** Rockledge, visitor parking behind RKL One
- November 27** Neuroscience Center, parking lot next to 6003 Executive Boulevard
- December 12** Building 45, front of building

2001 NIH Neurosciences Seminar Series

The NIH Neurosciences Seminar Series, which features lectures and discussions with leading international neuroscientists, began its 2001–2002 schedule this month. Lectures are held Mondays at noon in the Lipsett Amphitheater in Building 10 on the NIH campus, followed by receptions in the auditorium. The series runs through May 2002, and upcoming seminars are listed below. For more information, contact Dr. Story Landis at 301-435-2232 or by e-mail at landiss@ninds.nih.gov. A complete, up-to-date schedule is available at <http://neuroseries.info.nih.gov/index.html>.

October 29

Endocannabinoids—An Overview

by Raphael Mechoulam, Ph.D., Hebrew University

November 5

Mobilization of Vesicles from and Refilling of Specific Synaptic Vesicle Pools

by William Betz, Ph.D., University of Colorado Medical School

November 19

The Frizzled Family of Wnt Receptors

by Jeremy Nathans, M.D., Ph.D., Johns Hopkins University

November 26

fMRI Reveals Different Ventral Stream Processes in Awake Behaving Macaques and Humans

by Roger B.H. Tootell, Ph.D., Massachusetts General Hospital

NIH CALENDAR OF EVENTS

October 30

Medicine for the Public Lecture Series: *The Influenza Viruses and Their Vaccines* by Brian Murphy, M.D., National Institute of Allergy and Infectious Diseases, NIH, 7 P.M., Masur Auditorium, Building 10, NIH, free and open to the public. For more information, call 301-496-2563 or visit <http://www.cc.nih.gov/cc/mfp/series.html>.

WFLC Faces and Phases of Life Seminar Series: *Getting the Most from Your Brain, Part 2*, 1–2 P.M., Room 6C10, 6th floor, C-wing, Building 31, NIH, free and open to the public. For more information or to register, call 301-435-1619 or visit <http://wflc.od.nih.gov/faces.html>.

October 31

Wednesday Afternoon 2001–2002 NIH Director's Lecture Series: *Protein Folds, Functions, and Evolution* by Janet M. Thornton, University College, London, 3–4 P.M., Masur Auditorium, Building 10, NIH, free and open to the public. Continuing medical education credit is available. For more information, call Hilda Madine at 301-594-5595 or visit <http://www1.od.nih.gov/wals/schedule.htm>.

November 7

Wednesday Afternoon 2001–2002 NIH Director's Lecture Series: *STI571: A Tyrosine Kinase Inhibitor for the Treatment of Chronic Myelogenous Leukemia (CML) Validating the Promise of Molecularly Targeted Therapy* by Brian J. Druker, M.D., Oregon Health Sciences University Cancer Institute Leukemia Center, 3 P.M., Masur Auditorium, Building 10, NIH, free and open to the public. For more information, call Hilda Madine at 301-594-5595 or visit <http://www1.od.nih.gov/wals/schedule.htm>.

WFLC Faces and Phases of Life Seminar Series: *Getting the Most from Your Brain, Part 3*, 1–2 P.M., Room 6C6, 6th floor, C-wing, Building 31, NIH. For more information or to register, call 301-435-1619 or visit <http://wflc.od.nih.gov/faces.html>.

November 13

2001–2002 VRC Seminar Series: *Working Toward an AIDS Vaccine* by Dr. Harriet Robinson, Yerkes Primate Center and Emory University, 4–5 P.M., Main Floor Conference Center, Rooms 1201 & 1203, Building 40, NIH, free and open to the public. For more information, call 301-594-8491 or visit <http://vrc.nih.gov/cgi-shl/vrc/seminars2001.cfm>.

National Library of Medicine History of Medicine Seminar Series: *The History of Humane Societies in the United States (tentative)* by Dr. Bernard Unti, 2–3:15 P.M., Conference Room B, Building 38, NIH, free and open to the public. For more information, call 301-402-8878 or visit <http://www.nlm.nih.gov/hmd/seminars.html>.

(continued on page 6)

(continued from page 5)

November 14

Behavioral and Social Sciences Lecture Series: *Health Campaigns in the Age of Ubiquitous Media: Promise and Peril* by John R. Finnegan, Ph.D., University of Minnesota, 9–10 A.M., Balcony B, Natcher Conference Center, Building 45, NIH. For more information, call Ronald Abeles at 301-496-7859.

November 15

WFLC Faces and Phases of Life Seminar Series: *Weight Management*, noon–2 P.M., Wilson Hall, Building 1, NIH. For more information or to register, call 301-435-1619 or visit <http://wflc.od.nih.gov/faces.html>.

November 27

Wednesday Afternoon 2001–2002 NIH Director's Lecture Series*: *Science, the Public, and New Policies* by Rita R. Colwell, Ph.D., National Science Foundation, 3 P.M., Masur Auditorium, Building 10, NIH, free and open to the public. For more information, call Hilda Madine at 301-594-5595 or visit <http://www1.od.nih.gov/wals/schedule.htm>.

* *Special Tuesday lecture.*

November 28

Wednesday Afternoon 2001–2002 NIH Director's Lecture Series: *Molecular and Biological Analyses of BRCA1 Function* by David M. Livingston, M.D., Harvard Medical School, 3 P.M., Masur Auditorium, Building 10, NIH, free and open to the public. For more information, call Hilda Madine at 301-594-5595 or visit <http://www1.od.nih.gov/wals/schedule.htm>.

WFLC Faces and Phases of Life Seminar Series: *Community Resources for Seniors*, noon–2 P.M., Room 6C10, 6th floor, C-wing, Building 31, NIH. For more information or to register, call 301-435-1619 or visit <http://wflc.od.nih.gov/faces.html>.

****Call to confirm your event.** Because of the events of September 11, some events at NIH may have been postponed or cancelled. Please call to confirm the date and time before attending.

OTHER NEWS AND ACTIVITIES OF INTEREST

Bethesda Creates Unity Wall

Community members are invited to share their thoughts and prayers on the tragedies of September 11 by writing their sentiments on the Unity Wall. Downtown Bethesda erected the wall at Bethesda Place Plaza on September 14 and expanded it three days later to accommodate everyone. The wall will be available indefinitely,

and Ronald McDonald House Charities is collecting donations to send to the Red Cross disaster relief fund. Bethesda Place Plaza is located at Old Georgetown Road and Woodmont Avenue.

Bethesda honors Sept. 11 victims.

Montgomery County Holds Second Marathon in the Parks

The Montgomery County Marathon in the Parks was so successful in 2000 that they're doing it again. The 2001 Marathon takes place on Saturday, November 18, at 7 A.M. and features an enhanced course, timing system, and higher cash awards totaling \$9,000. Join 2,000 runners on a race that showcases the diversity of Montgomery County and finishes in the heart of Bethesda, right after the Wisconsin Avenue tunnel. Runners will enjoy a quiet, scenic route through Derwood, Lake Needwood, Garrett Park, Kensington, and Chevy Chase. A pre-race expo and pasta dinner will kick off the weekend with shopping, food, and complimentary massages. For more information, visit <http://www.marathonintheparks.com> or call 301-767-0002.

Miss Nelson is Missing at BAPA

BAPA's Imagination Stage, in its tenth season of entertaining children and their families, will premiere *Miss Nelson is Missing* on November 10. The musical, based on books by Harry Allard, follows Miss Nelson's students, who don't know how good they have it until Miss Nelson disappears only to be replaced by the dreadful Viola Swamp. Watch the students try to figure out what has happened to their teacher. *Miss Nelson is Missing* runs on Saturdays and Sundays, at 12:30 and 3 P.M., through January 13, 2002. Winter Break matinees will be held December 26–31 at 11:30 A.M. and 2 P.M. Tickets are \$6.50 for general admission and \$5.50 for groups of 10 or more. Advance purchase is recommended. BAPA's Imagination Stage is located at White Flint Mall, on the second level, next to Bloomingdale's, in Rockville. For more information or to purchase tickets, call the Imagination Stage box office at 301-881-5106.

Time for Halloween!

Parties and activities abound throughout Montgomery County in celebration of Halloween:

In Search of Ghosts. Meet the ghosts of Montgomery County's past on Friday, October 26, during 15-minute tours from 7 to 8 P.M. The Montgomery County Historical Society (MCHS) will meet you by the light of the moon at the Old Baptist Cemetery and walk by torchlight to the Beall-Dawson House in Rockville, where you'll hear Montgomery County ghost stories. Enjoy hot cider and ginger cakes. Admission is \$10 (\$7 for MCHS members); spaces available by reservation. For more information or to make reservations, call 301-762-1492.

Halloween Happening. Enjoy a costume parade, carnival games, bingo, and crafts at the Potomac Community Center on Sunday, October 28, 12:30–3 P.M. Admission is free. For more information, call 301-983-4471.

Halloween Party and Haunted House. All are welcome at this free event at the Leland Community Center in Chevy Chase. Enjoy games, candy, cake, and more, on October 28 at 4:30 P.M. For more information, call 301-652-2249.

Fall Festival. The Twinbrook community in Rockville will host its own fall festival where you can make scarecrows, play games, and see a parade on Sunday, October 28. Dress up and join the parade! The festival will be held at the Twinbrook Community Recreation Center and admission is \$3. For more information, call 301-315-5760.

Halloween Young Run. Parents and children 12 and under can participate in a quarter-, half-, or one-mile run at 9 a.m. on Sunday, November 4. The run starts at West Gude Drive in Rockville. Registration and fee are required. For more information, call 301-309-3330.

Round House Theater Premieres *Home*

Opening on October 31, the Round House Theater will present Samm-Art Williams' *Home*, a story of a

man's spiritual journey set in the 1950s, 60s, and 70s. Presented in a series of flashbacks, Cephus Miles' life plays out in the segregated South as the country becomes divided over civil rights and the Vietnam War. When it first opened, *Home* received a Tony Award nomination for Outstanding Play.

The Round House Theater is currently located at 12210 Bushey Drive in Silver Spring, Maryland. *Home* will run through November 25. Tickets range from \$23 to \$31, depending on the day and time of the performance. Persons under 30 can purchase tickets in advance for \$10. For more information, call the box office at 301-933-1644.

Strathmore Holds Museum Shop Around

Get a head start on your holiday shopping at the twelfth annual Museum Shop Around at Strathmore Hall. Billed as a shopping mall of museum shops, 17 regional museums, including the National Building Museum, the Corcoran Gallery of Art, the Library of Congress, and the Freer Gallery of Art, will participate. The Museum Shop Around will be held on Friday, November 9, from 10 A.M. to 8 P.M.; Saturday, November 10, and Sunday, November 11, from 10 A.M. to 6 P.M.; and Monday, November 12, from 10 A.M. to 4 P.M. Admission is \$6, and free, on-site parking is available. Strathmore is also accessible by Metro. For more information, call 301-530-0540 or visit <http://www.strathmore.org/events.html>. Strathmore Hall Arts Center is located at 10701 Rockville Pike in North Bethesda.

TRY THIS WEB SITE:

<http://www.niaid.nih.gov/newsroom/focuson/asthma01/default.htm>

The National Institute of Allergy and Infectious Diseases (NIAID) has released the Focus On Asthma Web site, which describes researchers' efforts to better understand, prevent, and treat asthma. The Web site features basic information on asthma, NIAID publications and links, and current NIAID research highlights. Research highlights to date include a connection between cockroaches and asthma in children, the work of asthma counselors in the inner city, and the possible protection against asthma that cats may offer.

VOLUNTEER OPPORTUNITIES

Men Needed for Vessel Disease Study

Men older than 45 are needed for a study assessing risk factors for atherosclerosis. Medical history and blood samples will be required to determine eligibility for the study, and current medications, including cholesterol medications and anti-hypertensives, may need to be discontinued. Compensation will be provided. For more information, call Rita Mincemoyer at 301-496-3666.

Infantile Neuronal Ceroid Lipofuscinosis

Help doctors at NIH determine if a drug called Cystagon® can be an effective treatment for Infantile Neuronal Ceroid Lipofuscinosis. For more information, call 1-800-411-1222.

Cognitive Neurosciences Studies

NIH invites volunteers to participate in a variety of neuropsychological tests, brain imaging studies, and related neurological evaluations. You must be between the ages of 6 and 80 and diagnosed with either CBD, frontotemporal dementia, Pick's disease, progressive aphasia, Urbach-Wiethe (Lipoid Proteinosis), or focal frontal lesions due to first stroke, first penetrating head injury, or first excised tumor. Call 1-800-411-1222 for more information.

Healthy Children Needed for NIMH Study

The National Institute of Mental Health (NIMH) is seeking healthy children aged 6–17 to review film clips that are humorous, sad, or spooky. Children must not have a history of psychiatric problems or be taking any prescribed medications. For more information, call 301-496-8381.

The OCL Update is available on our Web site at <http://ocl.od.nih.gov/>. If you would rather view this document online and not receive a printed version, please contact the OCL office at 301-496-3931 or send us an e-mail at jh69z@nih.gov. If you would like to list an upcoming event of interest to the local community, call Terry LaMotte at Palladian Partners, OCL support contractor, at 301-650-8660, or e-mail at tlamotte@palladianpartners.com.
